Subject: Re: residue samples

Hello Tom,

As a matter of fact I just received the test results Friday afternoon. I had already made report on the NPIIC web-site working with Bob Miller. I am planning to give Bob a call when I get a chance as we were going to try to figure out if you could fill out a report on the website and later on go back and add additional residues.

Please find attached report. I have monsanto here for the next couple of days finishing up an experiment so will be pretty busy.

Best regards, Randy

Greetings Randy,

I hope this finds you well and that your bees have rallied after the almond pollination.

In early March you indicated that your colonies in California had been sprayed and arrangements were made to have samples collected for residue analyses by the California Dept. of Pesticide Regulation. Would you be willing to submit a report to EPA with respect to this beekill incident? If so, then the report can be linked to the residue data once they become available.

Tom
